

Highliner

Over the years, Lidget Concrete Ltd., has built up an enviable reputation for the design and installation of bespoke buildings... tailor made for our customers requirements. This had led to the establishment of our own in-house specialist building division. This department is supervised by experienced engineers who liaise with the client to expertly recognise and implement their requirements.

All our work is undertaken with site safety of paramount importance, with method statements and risk assessments utilised for all aspects of the installation works.

For a full portfolio of our 'Highliner' buildings please contact our specialist building division through your local agent.

Batteries

Lidget Concrete Ltd., has constructed many types of battery garage arrangements throughout the UK Mainland. This work has been undertaken for various organisations including Local Authorities, Ministry of Defence Departments, Housing Associations, Property Developers as well as private individuals.

Operating within our Specialist Building Division Lidget Concrete's proven

approach of listening to what the client requires, then designing and building to budget and specification, has won us a considerable amount of repeat business.

If you are considering a garage battery arrangement, please contact your local agents and give our specialists a call.
